CHOICES FOR SUSTAINABLE LIVING: DISCUSSION COURSE DESCRIPTION

How does the way our society functions affect the Earth, and how can we be “a blessing to the planet”?	<p>“Definitions of Sustainability” Excerpts from “Easter’s End” by Jared Diamond “Making Other Arrangements” by James Howard Kunstler “Why Bother?” by Michael Pollan <i>You Can’t Be Neutral on a Moving Train</i> by Howard Zinn</p>

How can nature’s organizing principles be applied in design, production of goods, and everyday living?	<p>“Footprints to Sustainability” by Professor William E. Rees “The Technology Factory” by Paul R. and Anne H. Ehrlich “The Personal Impact of No Impact” by Colin Beavan “Mother Nature’s School of Design” by Janine Benyus Case Study: “Bear River’s ‘Living Machine’” by Dave Redwood and Sean Kelly Action Plan</p>

Communities	The more resources we use in the course of daily living, the larger our “ecological footprint” is. By looking at our actions within the framework of communities, we can learn to shrink that footprint-and gain a simpler, more balanced lifestyle.	<p>“The City After Oil” by Richard Register “If You Build It, Will They Change?” by Bill McKibben “Building Green Community on a Budget” by Liz Walker “Cook One Meal, Eat For a Week” by Joelle Novey “<i>The Common Life</i>” by Scott Russell Sanders “Forging Friendlier Neighborhoods” Action Plan</p>

Brown “It’s Folly to Save Jobs by Risking a Resource” by Donella Meadows “Feeding the Beast” by John Ehrenfeld “The Extravagant Gesture” by William McDonough and Michael Braungart “Bridging the Green Divide” by David Kupfer “Breaking Down Buildings, Building Up a Neighborhood” by Holly Dressel Action Plan</p>

White and Gloria Eugenia Gonzáles Mariño “Understanding the Social Transformation Process” by Christopher Uhl “The Great Turning” by Joanna Macy</p>
