

GLOBAL WARMING: CHANGING CO₂COURSE A FOUR SESSION DISCUSSION

“We are no longer passive victims of the climate system’s slow oscillations; we are now, as a collective, atmospheric engineers.”

- Alan AtKisson

Four sessions of discussion where one can:

- Learn more about the history and science of global warming.
- Explore personal values and habits as they relate to climate change.
- Consider actions to curb global warming.

SESSION 1..... OFF COURSE

Communities around the world are experiencing the effects of global warming. This session explores personal responses to climate change and why society has been slow to respond.

SESSION 2.....COLLISION COURSE

To better understand the complexities of global warming, this session breaks down the history and science of global climate change, and identifies our participation in this ecological crisis.

SESSION 3.....CHANGING COURSE

Although global warming is a daunting issue, there are accessible and significant actions we can all take. This session explores new strategies for addressing climate change and considers personal action to mitigate the effects of global warming.

SESSION 4..... SETTING A NEW COURSE

What will it take to create a sustainable future? Explore our individual and collective power to shape an effective response to climate change, enabling future generations to meet their needs.

For more information on how to start a discussion course please contact the Northwest Earth Institute at (503) 227-2807, email contact@nwei.org, or visit our website at www.nwei.org.

NORTHWEST EARTH INSTITUTE DISCUSSION COURSES – CURRENTLY OFFERED

VOLUNTARY SIMPLICITY

This eight session course explores the personal and environmental benefits of living simply and consuming less.

EXPLORING DEEP ECOLOGY

Deep Ecology is a term coined in 1973 by Norwegian philosopher and mountaineer Arne Naess. It describes an approach by which an individual reflects deeply on her or his relationship with the earth and responsibility for it. In nine sessions, participants discuss how personal values affect the way they view and treat the earth.

DISCOVERING A SENSE OF PLACE

Until modern times, survival of a human community depended on an intimate understanding of and respect for the distinctive geography, climate, plants, and animals located in their region. This eight session course considers the potential benefits of knowing and protecting our place. Will a commitment to the local bioregion affect our willingness to accept responsibility to care for the earth?

CHOICES FOR SUSTAINABLE LIVING

Each of us makes choices that have an impact on the earth. We can choose options that are more sustainable than others. In nine sessions, participants consider steps toward ecologically sustainable lifestyles, communities, and organizations.

GLOBALIZATION AND ITS CRITICS

Globalization involves the increased movement of goods, services, and capital across borders. The nine session course explores how globalization is affecting the environment, local economics, and social and cultural customs throughout the world.

HEALTHY CHILDREN – HEALTHY PLANET

To understand the pervasive effects of advertising, media, and our consumer culture can influence a child's view of the world. This eight session course covers topics such as exploring nature, time and creativity, and food and health.
